journal homepage: www.elsevier.com/locate/jmatprotec

Subject Index of Volume 195

Abrasion
Factors affecting some quality properties of the decorative surface overlays, 218
AISI 316L stainless steel
An effect of heat input, weld atmosphere and weld cooling conditions on the resistance spot weldability of 316L austenitic stainless steel, 327
Al_5Fe_2
Growth of intermetallic layer at roll bonded IF-steel/aluminum interface, 88
Al–Ni–Si–Cu alloy
Microstructural evolution and microhardness of a melt-spun Al–6Ni–2Cu–1Si (in wt.%) alloy, 58
Aluminium alloys
On strain localisation in tube hydroforming of aluminium extrusions, 3
Analysis
An industrial application for on-line detection of instability and wire breakage in wire EDM, 101
ANFIS
Determination of dielectric properties of insulator materials by means of ANFIS: A comparative study, 34
ANOVA
Optimization of cryogenic treatment to maximize the wear resistance of 18% Cr martensitic stainless steel by Taguchi method, 241
Aqueous method
Structural and electrical characteristic of crystalline barium titanate synthesized by low temperature aqueous method, 171
Artificial neural network (ANN)
Hybrid neural–GA model to predict and minimise flatness value of hot rolled strips, 314
Automation
Automation of strip-layout design for sheet metal work on progressive die, 94
Automotive structural components
Computational feasibility analysis of direct-adhesion polymer-to-metal hybrid technology for load-bearing body-in-white structural components, 282

Ball end milling
Surface topography in ball end milling process: Description of a 3D surface roughness parameter, 135
Barium titanate
Structural and electrical characteristic of crystalline barium titanate synthesized by low temperature aqueous method, 171
Bi-materials
Study of fabrication of Cu film on PFA by sputtering, 53
Bridge
The use of SiC powder in water as dielectric for micro-slit EDM machining, 160

Carbon steel
Parametric study on laser nitriding of 1.5919 steel, 299
CBN tools
Hard turning of interrupted surfaces using CBN tools, 275
Ceramics
Novel mullite-based ceramics manufactured from inorganic wastes. II: Mechanical behaviour, 255
Characterization
Effect of thermal treatment on the crystal structure and morphology of zirconia nanopowders produced by three different routes, 178
Cigarette resistance
Factors affecting some quality properties of the decorative surface overlays, 218
Coated steel sheet
Characterization of electrical contact conditions in spot welding assemblies, 117
Composite material
Direct laser fabrication of Ti6Al4V/TiB, 321
Compression
Effect of additives on flexible PVC foam formation, 144
Computational fluid dynamics
A computational model for the cooling phase of injection moulding, 305
Contact stress
Analysis of deformations and stresses in flat rolling of wire, 63
Continuous cooling
A computational model for the cooling phase of injection moulding, 305
Control system
Modelling of the nitriding process, 212
CPL
Factors affecting some quality properties of the decorative surface overlays, 218
Crater
The use of SiC powder in water as dielectric for micro-slit EDM machining, 160
Cryogenic treatment
Optimization of cryogenic treatment to maximize the wear resistance of 18% Cr martensitic stainless steel by Taguchi method, 241

Elsevier B.V.
doi:10.1016/S0924-0136(07)01133-8

Crystal structure
Effect of thermal treatment on the crystal structure and morphology of zirconia nanopowders produced by three different routes, 178
Cu
Study of fabrication of Cu film on PFA by sputtering, 53
Cutting edge
Hard turning of interrupted surfaces using CBN tools, 275

Decorative overlays
Factors affecting some quality properties of the decorative surface overlays, 218
Detection
An industrial application for on-line detection of instability and wire breakage in wire EDM, 101
Diagnosis
An industrial application for on-line detection of instability and wire breakage in wire EDM, 101
Die casting
Characterization of spray lubricants for the high pressure die casting processes, 267
Die lubrication
Characterization of spray lubricants for the high pressure die casting processes, 267
Dielectric losses
Determination of dielectric properties of insulator materials by means of ANFIS: A comparative study, 34
Dielectric properties
Determination of dielectric properties of insulator materials by means of ANFIS: A comparative study, 34
Diffusion
Growth of intermetallic layer at roll bonded IF-steel/aluminum interface, 88
Diffusion mechanism
Carbothermal synthesis of silicon nitride (Si_3N_4): Kinetics and diffusion mechanism, 224
Direct fabrication
High density selective laser melting of Waspaloy®, 77
Direct laser fabrication
Direct laser fabrication of Ti6Al4V/TiB, 321
Disperse discharge
The use of SiC powder in water as dielectric for micro-slit EDM machining, 160
Distribution of the refined grains
Effects of the simultaneous imposition of electromagnetic and magnetic forces on the solidification structure of pure Al and Al–4.5 wt.%Cu alloy, 125
DOE
Experimental study of Nd:YAG laser beam machining—An overview, 15
Domain
Structural and electrical characteristic of crystalline barium titanate synthesized by low temperature aqueous method, 171

EDM
The use of SiC powder in water as dielectric for micro-slit EDM machining, 160
Effective rake angle
Investigations of tool edge radius effect in micromachining: A FEM simulation approach, 204
EHF theory
Growth of intermetallic layer at roll bonded IF-steel/aluminum interface, 88
Electrical contact resistance
Characterization of electrical contact conditions in spot welding assemblies, 117
Electrochemical smoothing
Effective form design of electrode in electrochemical smoothing of end turning surface finishing, 44
Electrode design
Effective form design of electrode in electrochemical smoothing of end turning surface finishing, 44
Electro-discharge machining
Electro-discharge machining (EDM) versus hard turning and grinding—Comparison of residual stresses and surface integrity generated in AISI O1 tool steel, 186
Electromagnetic force
Effects of the simultaneous imposition of electromagnetic and magnetic forces on the solidification structure of pure Al and Al–4.5 wt.%Cu alloy, 125
End turning
Effective form design of electrode in electrochemical smoothing of end turning surface finishing, 44
Energetic efficiency
Modulation of power density distribution in time and space for high speed laser cladding, 27
Experimental–theoretical model
Modelling of the nitriding process, 212
Expert system
Automation of strip-layout design for sheet metal work on progressive die, 94
Extrusion weld
On strain localisation in tube hydroforming of aluminium extrusions, 3

Finish foils
Factors affecting some quality properties of the decorative surface overlays, 218
Finite element analysis
Investigations of tool edge radius effect in micromachining: A FEM simulation approach, 204
Flatness
Hybrid neural–GA model to predict and minimise flatness value of hot rolled strips, 314
Foam
Effect of additives on flexible PVC foam formation, 144
Forming limit
On strain localisation in tube hydroforming of aluminium extrusions, 3

Genetic algorithm (GA)
Hybrid neural–GA model to predict and minimise flatness value of hot rolled strips, 314
Grain growth
Investigation of limiting grain size and microstructure homogeneity in the presence of second phase particles using the Monte Carlo method, 195
Grinding
Electro-discharge machining (EDM) versus hard turning and grinding—Comparison of residual stresses and surface integrity generated in AISI O1 tool steel, 186

Hard turning
Electro-discharge machining (EDM) versus hard turning and grinding—Comparison of residual stresses and surface integrity generated in AISI O1 tool steel, 186

Hard turning of interrupted surfaces using CBN tools, 275
Hardness
Microstructural evolution and microhardness of a melt-spun Al–6Ni–2Cu–1Si (in wt.%) alloy, 58
Heat conduction losses
Modulation of power density distribution in time and space for high speed laser cladding, 27
Heat flux measurement
Characterization of spray lubricants for the high pressure die casting processes, 267
Heat transfer
Characterization of spray lubricants for the high pressure die casting processes, 267
High power CO_2 continuous laser
Parametric study on laser nitriding of 1.5919 steel, 299
Hot forging
Influence of the inaccuracy of thermal contact conductance coefficient on the weighted-mean temperature calculated for a forged blank, 260
Hot rolled (HR)
Hybrid neural–GA model to predict and minimise flatness value of hot rolled strips, 314
HPL
Factors affecting some quality properties of the decorative surface overlays, 218
Hydroforming
On strain localisation in tube hydroforming of aluminium extrusions, 3

Impedance spectroscopy
Structural and electrical characteristic of crystalline barium titanate synthesized by low temperature aqueous method, 171
Infrared visualization
Characterization of spray lubricants for the high pressure die casting processes, 267
Inhomogeneous deformation
Analysis of deformations and stresses in flat rolling of wire, 63
Injection moulding
A computational model for the cooling phase of injection moulding, 305
Instability
An industrial application for on-line detection of instability and wire breakage in wire EDM, 101
Insulators
Determination of dielectric properties of insulator materials by means of ANFIS: A comparative study, 34
Interface
Characterization of electrical contact conditions in spot welding assemblies, 117
Interlayer
Control of energetic conditions by employing interlayer of different thickness for explosive welding of titanium/304 stainless steel, 232
Intermetallic layer
Control of energetic conditions by employing interlayer of different thickness for explosive welding of titanium/304 stainless steel, 232

Kinetic energy loss
Control of energetic conditions by employing interlayer of different thickness for explosive welding of titanium/304 stainless steel, 232
Kinetic mechanism
Carbothermal synthesis of silicon nitride (Si_3N_4): Kinetics and diffusion mechanism, 224
Kinetic model
Carbothermal synthesis of silicon nitride (Si_3N_4): Kinetics and diffusion mechanism, 224

Laser beam machining
Experimental study of Nd:YAG laser beam machining—An overview, 15
Laser cladding
Modulation of power density distribution in time and space for high speed laser cladding, 27
Laser melting
High density selective laser melting of Waspaloy®, 77
Laser processing
Parametric study on laser nitriding of 1.5919 steel, 299
Laser surface treatment
Laser surface treatment of electroless Ni–P coatings on Al356 alloy, 154
Luffa cylindrical
Effect of additives on flexible PVC foam formation, 144

Machining strategy
Surface topography in ball end milling process: Description of a 3D surface roughness parameter, 135
Magnetic force
Effects of the simultaneous imposition of electromagnetic and magnetic forces on the solidification structure of pure Al and Al–4.5 wt.%Cu alloy, 125
Martensite variant
Micro-structural analysis of self-accommodating martensites in Cu–11.92 wt%Al–3.78 wt%Ni shape memory alloy, 72
Material removal rate
The use of SiC powder in water as dielectric for micro-slit EDM machining, 160
Mechanical properties
Novel mullite-based ceramics manufactured from inorganic wastes. II: Mechanical behaviour, 255
Mechanical recycling
The influence of polyethylene in the mechanical recycling of polyethylene terephtalate, 110
Melt atomization
Nitrogen spray atomization of molten tin metal: Powder morphology characteristics, 248
Melt spinning
Microstructural evolution and microhardness of a melt-spun Al–6Ni–2Cu–1Si (in wt.%) alloy, 58
Microhardness
Parametric study on laser nitriding of 1.5919 steel, 299
Micromachining
Investigations of tool edge radius effect in micromachining: A FEM simulation approach, 204
Microstructure
Microstructural evolution and microhardness of a melt-spun Al–6Ni–2Cu–1Si (in wt.%) alloy, 58
Monte Carlo method
Investigation of limiting grain size and microstructure homogeneity in the presence of second phase particles using the Monte Carlo method, 195
Mullite
Novel mullite-based ceramics manufactured from inorganic wastes. II: Mechanical behaviour, 255

Nanoparticles
Effect of thermal treatment on the crystal structure and morphology of zirconia nanopowders produced by three different routes, 178
Structural and electrical characteristic of crystalline barium titanate synthesized by low temperature aqueous method, 171
Natural zeolite
Effect of additives on flexible PVC foam formation, 144
Nd:YAG
Experimental study of Nd:YAG laser beam machining—An overview, 15
Ni–P coating
Laser surface treatment of electroless Ni–P coatings on Al356 alloy, 154
Nitriding
Parametric study on laser nitriding of 1.5919 steel, 299

Optimisation
Hybrid neural–GA model to predict and minimise flatness value of hot rolled strips, 314

Particleboard
Factors affecting some quality properties of the decorative surface overlays, 218
Peel strength
Study of fabrication of Cu film on PFA by sputtering, 53
PFA
Study of fabrication of Cu film on PFA by sputtering, 53
Piston ring
Optimization of cryogenic treatment to maximize the wear resistance of 18% Cr martensitic stainless steel by Taguchi method, 241
Polyethylene
The influence of polyethylene in the mechanical recycling of polyethylene terephtalate, 110
Polyethylene terephtalate
The influence of polyethylene in the mechanical recycling of polyethylene terephtalate, 110
Polymer metal adhesion
Computational feasibility analysis of direct-adhesion polymer-to-metal hybrid technology for load-bearing body-in-white structural components, 282
Polymer metal hybrids
Computational feasibility analysis of direct-adhesion polymer-to-metal hybrid technology for load-bearing body-in-white structural components, 282
Powder technology
Novel mullite-based ceramics manufactured from inorganic wastes. II: Mechanical behaviour, 255
Process parameter
Experimental study of Nd:YAG laser beam machining—An overview, 15
Profile
Hybrid neural–GA model to predict and minimise flatness value of hot rolled strips, 314
Progressive die
Automation of strip-layout design for sheet metal work on progressive die, 94
PVC
Effect of additives on flexible PVC foam formation, 144

Quality characteristics
Experimental study of Nd:YAG laser beam machining—An overview, 15

Rapidly solidified
Microstructural evolution and microhardness of a melt-spun Al–6Ni–2Cu–1Si (in wt.%) alloy, 58
Refractories
Novel mullite-based ceramics manufactured from inorganic wastes. II: Mechanical behaviour, 255
Residual stress
Analysis of deformations and stresses in flat rolling of wire, 63
Electro-discharge machining (EDM) versus hard turning and grinding—Comparison of residual stresses and surface integrity generated in AISI O1 tool steel, 186
Resistance spot weldability
An effect of heat input, weld atmosphere and weld cooling conditions on the resistance spot weldability of 316L austenitic stainless steel, 327
Resistivity
Study of fabrication of Cu film on PFA by sputtering, 53
Result sensor
Modelling of the nitriding process, 212
Rheology
The influence of polyethylene in the mechanical recycling of polyethylene terephtalate, 110
Roll bonding
Growth of intermetallic layer at roll bonded IF-steel/aluminum interface, 88

Sample controlled reaction temperature (SCRT)
Carbothermal synthesis of silicon nitride (Si_3N_4): Kinetics and diffusion mechanism, 224
Scan velocity
Modulation of power density distribution in time and space for high speed laser cladding, 27
Scanning electron microscopy (SEM)
Micro-structural analysis of self-accommodating martensites in Cu–11.92 wt%Al–3.78 wt%Ni shape memory alloy, 72
Scratch
Factors affecting some quality properties of the decorative surface overlays, 218
Second phase particle
Investigation of limiting grain size and microstructure homogeneity in the presence of second phase particles using the Monte Carlo method, 195
Selective laser melting
High density selective laser melting of Waspaloy®, 77
Self-accommodation
Micro-structural analysis of self-accommodating martensites in Cu–11.92 wt%Al–3.78 wt%Ni shape memory alloy, 72
Shape memory alloy (SMA)
Micro-structural analysis of self-accommodating martensites in Cu–11.92 wt%Al–3.78 wt%Ni shape memory alloy, 72
Sheet metal work
Automation of strip-layout design for sheet metal work on progressive die, 94
Silicon nitride carbothermal reduction
Carbothermal synthesis of silicon nitride (Si_3N_4): Kinetics and diffusion mechanism, 224
Simulation
Investigation of limiting grain size and microstructure homogeneity in the presence of second phase particles using the Monte Carlo method, 195
Influence of the inaccuracy of thermal contact conductance coefficient on the weighted-mean temperature calculated for a forged blank, 260

Slate
Novel mullite-based ceramics manufactured from inorganic wastes. II: Mechanical behaviour, 255
Solid freeform fabrication
High density selective laser melting of Waspaloy®, 77
Spatial modulation
Modulation of power density distribution in time and space for high speed laser cladding, 27
Spot welding
Characterization of electrical contact conditions in spot welding assemblies, 117
Spray cooling
Characterization of spray lubricants for the high pressure die casting processes, 267
Sputter deposition
Study of fabrication of Cu film on PFA by sputtering, 53
304 Stainless steel
Control of energetic conditions by employing interlayer of different thickness for explosive welding of titanium/304 stainless steel, 232
Steel/aluminum
Growth of intermetallic layer at roll bonded IF-steel/aluminum interface, 88
Strip-layout design
Automation of strip-layout design for sheet metal work on progressive die, 94
Structure refinement
Effects of the simultaneous imposition of electromagnetic and magnetic forces on the solidification structure of pure Al and Al–4.5 wt.%Cu alloy, 125
Sugeno type fuzzy inference system
Determination of dielectric properties of insulator materials by means of ANFIS: A comparative study, 34
3D surface topography
Surface topography in ball end milling process: Description of a 3D surface roughness parameter, 135
Surface integrity
Electro-discharge machining (EDM) versus hard turning and grinding—Comparison of residual stresses and surface integrity generated in AISI O1 tool steel, 186
Surface modification
Parametric study on laser nitriding of 1.5919 steel, 299
Surface roughness
Surface topography in ball end milling process: Description of a 3D surface roughness parameter, 135
The use of SiC powder in water as dielectric for micro-slit EDM machining, 160
Synthesis
Effect of thermal treatment on the crystal structure and morphology of zirconia nanopowders produced by three different routes, 178
System of visualization of nitriding process
Modelling of the nitriding process, 212

Taguchi optimization
Optimization of cryogenic treatment to maximize the wear resistance of 18% Cr martensitic stainless steel by Taguchi method, 241
Temporal modulation
Modulation of power density distribution in time and space for high speed laser cladding, 27
Thermal contact conductance coefficient
Influence of the inaccuracy of thermal contact conductance coefficient on the weighted-mean temperature calculated for a forged blank, 260
TiB reinforced titanium alloys
Direct laser fabrication of Ti6Al4V/TiB, 321
Tin powder
Nitrogen spray atomization of molten tin metal: Powder morphology characteristics, 248
Titanium
Control of energetic conditions by employing interlayer of different thickness for explosive welding of titanium/304 stainless steel, 232
Tool edge radius
Investigations of tool edge radius effect in micromachining: A FEM simulation approach, 204
Transmission electron microscopy (TEM)
Micro-structural analysis of self-accommodating martensites in Cu–11.92 wt%Al–3.78 wt%Ni shape memory alloy, 72

Ultrasonic
Effective form design of electrode in electrochemical smoothing of end turning surface finishing, 44

Varnish
Factors affecting some quality properties of the decorative surface overlays, 218

Waspaloy®
High density selective laser melting of Waspaloy®, 77
Waste materials
Novel mullite-based ceramics manufactured from inorganic wastes. II: Mechanical behaviour, 255
Wear
Hard turning of interrupted surfaces using CBN tools, 275
Wear resistance
Optimization of cryogenic treatment to maximize the wear resistance of 18% Cr martensitic stainless steel by Taguchi method, 241
WEDM
An industrial application for on-line detection of instability and wire breakage in wire EDM, 101
Weld atmosphere
An effect of heat input, weld atmosphere and weld cooling conditions on the resistance spot weldability of 316L austenitic stainless steel, 327
Wire breakage
An industrial application for on-line detection of instability and wire breakage in wire EDM, 101
Wire flattening
Analysis of deformations and stresses in flat rolling of wire, 63
Wire rolling
Analysis of deformations and stresses in flat rolling of wire, 63

Zirconia
Effect of thermal treatment on the crystal structure and morphology of zirconia nanopowders produced by three different routes, 178

G. Nemli

Carbothermal synthesis of silicon nitride (Si_3N_4): Kinetics and diffusion mechanism 224
A. Ortega, M.D. Alcalá, C. Real

Control of energetic conditions by employing interlayer of different thickness for explosive welding of titanium/304 stainless steel 232
P. Manikandan, K. Hokamoto, M. Fujita, K. Raghukandan, R. Tomoshige

Optimization of cryogenic treatment to maximize the wear resistance of 18% Cr martensitic stainless steel by Taguchi method 241
J.D. Darwin, D. Mohan Lal, G. Nagarajan

Nitrogen spray atomization of molten tin metal: Powder morphology characteristics 248
R. Metz, C. Machado, M. Houabes, M. Elkhatib, M. Hassanzadeh

Novel mullite-based ceramics manufactured from inorganic wastes. II: Mechanical behaviour 255
F.A.C. Oliveira, V. Livramento, F. Delmas

Influence of the inaccuracy of thermal contact conductance coefficient on the weighted-mean temperature calculated for a forged blank 260
A. Polozine, L. Schaeffer

Characterization of spray lubricants for the high pressure die casting processes 267
A.S. Sabau, R.B. Dinwiddie

Hard turning of interrupted surfaces using CBN tools 275
A.E. Diniz, A.J. de Oliveira

Computational feasibility analysis of direct-adhesion polymer-to-metal hybrid technology for load-bearing body-in-white structural components 282
M. Grujicic, V. Sellappan, G. Arakere, N. Seyr, M. Erdmann

Parametric study on laser nitriding of 1.5919 steel 299
P.P. Psyllaki, A. Griniari, D.I. Pantelis

A computational model for the cooling phase of injection moulding 305
A.G. Smith, L.C. Wrobel, B.A. McCalla, P.S. Allan, P.R. Hornsby

Hybrid neural–GA model to predict and minimise flatness value of hot rolled strips 314
S. John, S. Sikdar, P.K. Swamy, S. Das, B. Maity

Direct laser fabrication of Ti6Al4V/TiB 321
F. Wang, J. Mei, X. Wu

An effect of heat input, weld atmosphere and weld cooling conditions on the resistance spot weldability of 316L austenitic stainless steel 327
B. Kocabekir, R. Kaçar, S. Gündüz, F. Hayat
